FOR IMMEDIATE RELEASE

### Quick Sort LA Purchases New Building

Los Angeles, Aug. 29 – Quick Sort, a premier barcode sorting company in California, recently purchased a 46,500 square foot building in Los Angeles. Quick Sort will move their current Los Angeles operation into this new building in the Fall of 2006.

“Quick Sort experienced a lot of growth in the past several years. We are thrilled to have purchased this building because it not only meets our space needs, but it also offers a tremendous amount of security. We held out to find the perfect building to meet our security needs and we believe we now have the best set up for a secured presort operation,” said Mauro Rivero Jr., President of Quick Sort.

Quick Sort’s new building, located at 3656 Noakes Street, includes a huge power service – 5000 Amps, a secured yard with security cameras both inside and outside the facility, dock high and ground level loading and concrete tilt-up construction.

Quick Sort, headquartered in San Ramon, California, has Presort Processing Plants in Los Angeles, North Hollywood, Santa Ana, W. Sacramento and San Ramon.
